## BRIGHTLING EQUIPMENT ARTIFICIAL LIFT

Drillman are proud to be the exclusive Australasian agent for Brightling Equipment Ltd of Canada. Brightling Equipment is a specialist manufacture of Artificial Lift Products. The team at Drillman and Brightling Equipment pride themselves on being some of the most experienced and technically competent people in the entire industry. Our attention to detail, strong Research and Development team, dedication to safety and protecting our Environment as well as a "customer first" mentality set us apart from our competition. Please visit our website or call one of our technical support staff to see how Drillman and Brightling Equipment can save you money and reduce your headaches.

Drillman have partnered with Brightling Equipment to offer an alternative for the Oil & Gas surface equipment supply and repair. We recognized that there was an opportunity to improve the quality of product, level of service and commitment to the end user. By partnering our dynamic organizations of highly skilled and experienced persons who are dedicated to providing quality solutions, products and services to our customers and it is this basis that we are building our business upon. Even though we feel we currently lead the market place in product design, service and quality, Drillman and Brightling are dedicated to continuing researching ways to improve all aspects of our business. In short, we feel we are currently the best and are dedicated to improving at a rate that ensures we always will be.

Our team is diversified in experience ranging from design, manufacture, repair, production and Quality Control in the oil and gas sector with many years companies not only our superior product but be an alternative provider to repair existing surface equipment to OEM specifications at a competitive price.
